THE G5 LOCOMOTIVE COMPANY
Recreating a legend

About No.1759

NER Class O 0-4-4 (LNER Class G5) locomotives served their purpose well for over 60 years, and throughout this time, didn't require any substantial design changes. Designed by Wilson Worsdell in 1893, 110 were built between 1894 and 1901 but none have survived. The Class G5 Locomotive Company want to bring back this lost North East legend and are already over two thirds of the way there. The Company and The Friends of The Class G5 Locomotive Company have already received funds over £800,000, by way of Shares, donations, monthly supporters, component sponsorship and The Crank Axle Fund.

Progress to date:

The Class G5 Locomotive Company already has all the major and expensive components, with an estimated £500,000 left to raise in order to complete the engine.

- Frames ordered, received and erected
- Boiler manufactured in Britain
- Cab erected
- Smokebox manufactured
- Leading Wheelset delivered
- Bogie completed
- Tyres and wheels for trailing wheelset delivered
- Crank Axle in production
- Westinghouse pump delivered
- Both mechanical lubricators delivered along with both injectors and both safety valves
- Some smaller cab fittings delivered

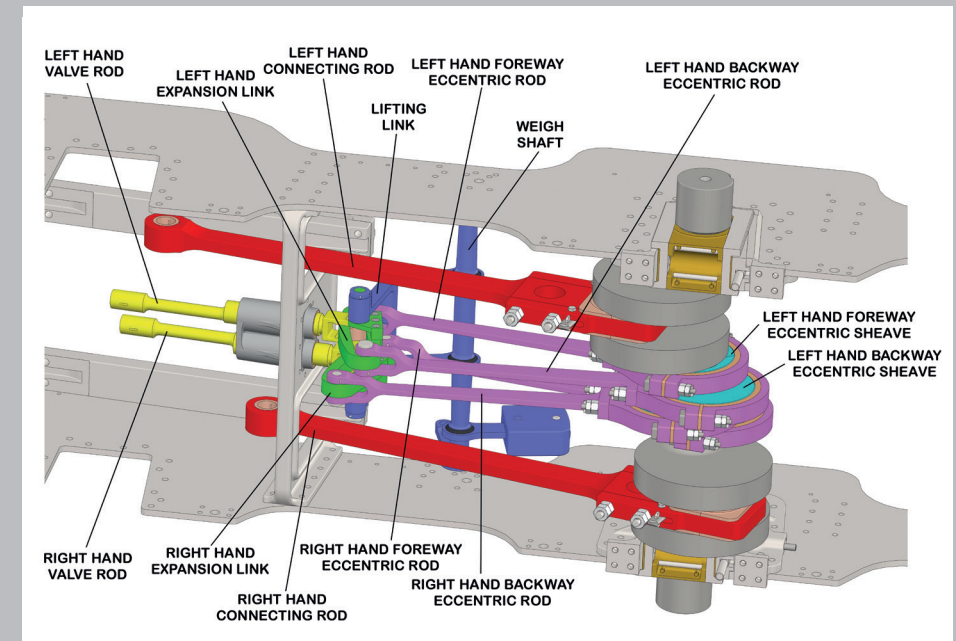

The Motion Fund

Aims to raise £90,000 by 150 people giving £600. This fund raising initiative will purchase all the components featured below in the 3D CAD model.

By contributing to The Motion Fund, you will receive the following benefits:

- A 6" replica brass worksplate carrying the number 1759
- A seat on the first train pulled by the G5 – free of charge
- An opportunity to become a shareholder with 30% EIS tax relief (not compulsory!)
- A regular newsletter
- An invite to our annual conference

David Elliott

This is a unique opportunity, as we are offering a 6" replica worksplate as part of your membership – something most other new build projects are unable to offer!

Please fill out the form on the reverse and return it to the address below.
